### PRODUCER

Nederburg is one of South Africa's leading wineries, with a prize-winning pedigree that stems from a culture of innovation and disciplined attention to detail. The wines are richly fruited with elegant, fresh flavours and structure, and range from exclusive, micro-edition offerings for the connoisseur to wines styled for everyday enjoyment.

### VINEYARD INFORMATION

The grapes were sourced from vineyards in the Durbanville and Paarl areas. The vines, situated some 120m to 160m above sea level and planted between 1984 and 1993, are grown in Tukulu and Oakleaf soils. Grafted onto nematode-resistant rootstock Richter 99, the vines received supplementary irrigation.

### VINIFICATION

The Botrytis cinerea (noble rot) grapes were strictly selected and harvested by hand at 35° to 40° Balling during April. The fruit was destemmed in the cellar prior to pressing, given extended skin contact and then cool-fermented in temperature-controlled stainless-steel tanks at 16°C. The wine did not undergo malolactic fermentation, but rather put through a separator to prevent fermentation from occurring once the desired sugar and alcohol levels had been reached. The wine also did not undergo wood maturation. The wine was blended, stabilised and sterile-filtered before bottling.

### RECOMMENDATION

Excellent with pâtés, blue cheese, desserts, cakes, pastries and tarts.
